### **DETAILED ACTION**

The terminal disclaimer and amendment filed August 26, 2002 have been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in the prior Office action.

#### ***Terminal Disclaimer***

The terminal disclaimer filed on August 26, 2002 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Plant Patent No. 12,588 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### **Claim Rejections-35 USC § 112 and Response to Arguments**

#### ***Written Description***

Claims 13-24 and 26-30 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/ or use the invention.

Claims 13-24 and 26-30 are drawn to a trailing interspecific *impatiens* plant by crossing *Impatiens flaccida* with *Impatiens hawkeri* and its progeny. However, the specification only discloses the crossing of *Impatiens flaccida* with *Impatiens hawkeri* resulting in a progeny with a trailing habit such as 2245B. Applicant argues that specification sufficiently describes how to produce a trailing interspecific *impatiens* plant that would enable a skilled artisan in the art to which it pertains to make and/or use the invention. This argument is not persuasive because the written description requirement is separate and distinct from the enablement. In re Barker,

559 F.2d 588, 194 USPQ 470 (CCPA 1977), cert. denied, 434 U.S. 1064 (1978); Vas-Cath, Inc. v. Mahurkar, 935 F.2d 1555, 1562, 19 USPQ2d 1111, 1115 (Fed. Cir. 1991). See MPEP 2161.

### **Enablement**

Claims 19-24 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 19 employs novel plants, seeds and plant parts. Since the plants of 2245B are essential to the claimed invention, they must be obtainable by a repeatable method set forth in the specification or otherwise be readily available to the public. Applicant argues that the Examiner states that the seeds of 2245B need to be deposited at a recognized depository. This is false because on paper number 20, page 6 it is suggested that the applicant deposit "regenerable tissues of 2245B" not seeds at a recognized depository.

### **2<sup>nd</sup> Paragraph**

The rejection of claims 17-19 and 29 under 35 U.S.C. 112, second paragraph, (paper number 20) is withdrawn in view of Applicant's amendment.

### **Conclusion**

Claim 25 is allowed.
